

# HIBERBULL

## Abstract :

Hiberbull is a community-driven meme coin a world where bear markets kill hope, Hiberbull reminds everyone that every sleep ends with a powerful awakening.

This project aims to build a creative and positive community that revives the bullish spirit through humor, memes, and collective energy.

---

## The Story (Lore) :

Once upon a time, the crypto world was alive with excitement. Bulls were roaring, coins were pumping, and people believed in overnight fortune. But then came the long, cold **Crypto Winter**. The bears took over. The charts turned red, the memes went silent, and even Doge looked tired. And so, the great bull — Hiberbull — decided to rest. He walked deep into the blockchain mountains, found a quiet digital cave, and fell into a long **hibernation**. Traders whispered:

***"The bull is dead. The age of bulls is over."***

But they were wrong. Hiberbull wasn't dead — he was just charging his energy. For every new block mined, for every meme posted, a spark of strength returned to him. He dreamed of greener charts and a laughing community that never gave up. Until one day, in 2025, the ground began to tremble. The blockchain pulsed. The markets stirred. And Hiberbull opened his eyes. He rose from his digital cave, looked at the red charts around him, and laughed.

***"I wasn't defeated. I was just napping. Now, it's my turn!"***

Now he's back — leading a new generation of degens, dreamers, and memers. Hiberbull stands for patience, awakening, and unstoppable optimism. Because even a bull that sleeps for years will eventually wake up...and when he does, no bear is safe.

***"I wasn't dead — I was just sleeping. Now, I'm back."***

# HIBERBULL

## Mission & Vision :

### Mission:

To bring back laughter, hope, and community to the crypto space through memes and rewards.

### Vision:

To become the strongest meme community in the world — where humor, unity, and optimism lead the charge.

## Tokenomics :

| Category                   | Allocation | Description                                             |
|----------------------------|------------|---------------------------------------------------------|
| Liquidity & Initial Launch | 50%        | Locked in DEX liquidity to build trust and stability    |
| Community & Airdrops       | 20%        | Because without the community, we're just another token |
| Development & Marketing    | 10%        | To fuel our caffeine addiction and push viral campaigns |
| Burned Supply              | 20%        | Every cat needs a little fire to play with              |

Total Supply = 1,000,000,000

# HIBERBULL

## 👑 Core Features :

### 1. Monthly Holder Reward System

Hiberbull implements a unique **monthly reward system** for top holders.

At the end of each month, rewards are distributed among loyal and active holders based on their token balance and community engagement.

This system encourages long-term holding and strengthens the bond between the project and its community.

### 2. Smart Tax Mechanism & Liquidity Growth

Every transaction includes a small tax, which is automatically distributed into three key areas:

- **Liquidity Pool:** A portion is added to the LP to stabilize price and prevent volatility.
- **Token Burn:** A fraction of tokens are permanently burned, increasing scarcity and long-term value.
- **Community Fund:** Supporting marketing, contests, and development of the ecosystem.

This creates a **self-sustaining economic model** that continuously strengthens Hiberbull's value.

### 3. HiberSwap – Decentralized Exchange

A dedicated HiberSwap DEX will be launched on the official website, allowing users to buy and trade Hiberbull directly without intermediaries.

This move will enhance the token's independence, reduce reliance on external exchanges, and provide a secure, community-friendly trading experience.

# HIBERBULL

## 4. Initial Airdrop & Activity Rewards

At launch, Hiberbull will conduct a free airdrop event.

Participants can earn tokens based on their engagement — inviting friends, sharing memes, or participating in community events.

The goal is to distribute tokens fairly and create early excitement around the project.

### Roadmap :

#### 1. Monthly Holder Reward System

##### Phase 1 – Awakening Q1 2026

- Launch website & token
- Build community on Twitter & Telegram
- Global #WakeTheBull campaign

Goal: Introduce the project and gather the first wave of supporters

##### Phase 2 – Charging Q2 & Q3 2026

- DEX listing
- Launch Meme2Earn on website (free)

Goal: Enable initial trading and reward community engagement

##### Phase 3 – NFT Collection Q4 2026

- Release NFT series

Goal: Expand ecosystem and create collectible value

# HIBERBULL

## Phase 4 – Rampage Q1 & Q2 & Q3 & Q4 2027

- Activate DAO
- Partner with DeFi & Gaming projects
- Global marketing & branding expansion

#### 4. More details about how rewards are distributed to holders

1% of all transaction taxes will be automatically transferred to a fully transparent wallet. At the end of each month, the total funds collected in this wallet will be distributed proportionally among all token holders.
